Methodology

Products featured in this list were identified in at least five user reviews as other products considered at the same time as Quickbooks Online.

Typical customers: If at least 20% of reviewers come from a particular business size, we classify the product as having customers from those business size(s).

How we define small, midsize and enterprise businesses: We define small businesses as those that have one to 200 employees, midsize businesses as those that have between 201 to 1,000 employees, and enterprises as those with more than 1,000 employees. Software Advice asks reviewers to provide the number of employees in their business, and we leverage that in our report.

Rating scores calculation: Each rating is given on a scale of 1-5, then multiplied by a factor of 20 to bring it onto a scale of 20-100. The final rating is the average of all ratings from qualified reviews.

Time period: Only reviews collected between January 2021 and January 2023 have been considered for this report.

Note: The content in this piece provides the opinions and points of view expressed by users. It does not represent the views of Software Advice.

About Software Advice

Software Advice simplifies software buying. Through 1-on-1 conversation and trusted insights, industry-specific advisors guide buyers to top software options in as little as 15 minutes (and it's 100% free).
