Informative Review Excerpts

Xero	All reviews
I also liked the reports feature, as it makes it super easy to track for one to choose the message that they would like to run, and the reconciliation is super easy and saves a lot of time.
I adore its reporting frequency and daily tasks management capacities. It's a nice tool for small businesses and ultimately delivers outstanding results.
The automation of bank reconciliation invoice creation and payment reminders has been one of the top things that i liked the most and is useful. The customization available is also just too good.

Sage Intacct	All reviews
I find Sage Intacct to be an excellent tool due to its flexibility, impressive dashboarding capabilities, and seamless integration with our existing software.
Sage Intacct has become the backbone of our financial management operations. The program's robust accounting and reporting capabilities are outstanding.
Having worked as a consultant within the space of implementing Sage Solutions I would say it's a fantastic solution for SMEs when it comes to most if not all their accounting needs.

Quickbooks Online	All reviews
Overall the software is super user friendly, does exactly what I need it to do and perfect for a small business like mine - but also love that I know it can grow as I do.
What I like the best about this software was its integration with other products So it's just seamless with point of sale software, other accounting softwares and the IRS and our banking to be honest.
Quickbooks Can Help with Small business like Finances, I like how Quickbooks does make it easy to do every quickly. Customer Service was So friendly and helpful I would Gladly recommend Quickbooks.

Methodology

For this report, we have compared **Xero**, **Sage Intacct** and **Quickbooks Online** by leveraging verified user reviews written on Software Advice, Capterra, and GetApp.

Review count minimum: Products must have 20 or more unique reviews within the time period listed below, with at least 10 unique ratings in each of the following categories: ease of use, value for money, customer support, functionality, and likelihood to recommend.

Rating scores calculation: Each rating field is multiplied by a factor of 20 to bring it onto a scale of 20-100. The final rating is the average of all ratings from qualified reviews. Note: Likelihood to recommend is scored on a scale that's double other rating fields and is thus multiplied by a factor of 10 to bring it on the same scale as the other fields.

Time period: To maintain freshness and provide up-to-date insights, only reviews collected between March 2022 and March 2024 have been considered for this report.

Most informative review excerpts: Review excerpts are passages that are extracted from longer reviews written by verified users. These excerpts are obtained through the application of an algorithm that considers factors including, but not limited to, word count and topic coverage.

Note: The content in this piece provides opinions and points of view expressed by users.
